Description

I'am using the Corine Land Cover data for a projet. There is around 40 types of land use in this database. In my print composer with my scale (1:20 000) I never have more than 10 type of land use at the same time.

I would like to show in the legend, only those 10 type of land use. It would be great to have the same option than for the table.

Cheers

Arthur
