

QGIS Application - Bug report #10009

Shp save as CSV is empty

2014-04-07 07:32 AM - Barbara Weidenhoefer

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:		
Affected QGIS version:	2.2.0	Regression?: No
Operating System:	Win7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 18497
Description		
using qgis 2.2.0 on a windows 7 notebook		
OBSERVED: "save as..." CSV generates an empty csv file. csv file only contains the column header.		
EXPECTED: "save as..." genereates a csv file with lat lon coordinates.		
Note:		
- using a kml or shp file for export (kml attached)		
- save as csv works in previous version (2.0.1)		

History

#1 - 2014-04-07 06:53 PM - Giovanni Manghi

- Status changed from Open to Feedback

cannot confirm here on Linux and Windows.

#2 - 2014-04-08 06:42 PM - Antonio Locandro

- File singapur.csv added

- File export.png added

I think something is happening, I tried it myself and I can get points to work but not lines and polygons no matter what settings I change

#3 - 2014-04-09 09:07 AM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

The tools works fine.

If the input file is a point layer, then there are no difficulties.

If the input file is a line or polygon layer then the geometry needs to be exported as WKT: in QGIS 2.2 there is this option.

It has no sense exporting a line/polygon geometry as "X/Y".

When the user choosen not to export the geometry then only the attributes are exported, and this is what happens also with the provided kml.
