

QGIS Application - Bug report #10013

Centroid fill rendering issue when size is data defined

2014-04-07 06:40 PM - Giovanni Manghi

Status: Closed	
Priority: High	
Assignee:	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 18500
Description	
Pick a polygon layer, and create a fill made of two symbology layers, one of them a centroid fill with size defined by data. If the symbol of the centroid fill is bigger than the underlying polygon, then bad thing happens, see attached image.
