QGIS Application - Feature request #10067
Populate attribute column with a spatial join

2014-04-14 02:40 PM - gallaecia gis

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	18543

Description

Working with two polygon layers, I can not find a direct way to populate an existing attribute column through a spatial join, inside Qgis > Vector > Data management tools. An alternative way could be doing a 'Join by Location' and 'crop' only desired attribute columns.

Kind Regards
