

## QGIS Application - Bug report #1008

### zoom to layer missbehaves when the layer is a single vector point

2008-03-25 10:36 AM - Maciej Sieczka -

<b>Status:</b> Closed	
<b>Priority:</b> Low	
<b>Assignee:</b> nobody -	
<b>Category:</b> Map Canvas	
<b>Affected QGIS version:</b>	<b>Regression?:</b> No
<b>Operating System:</b> All	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 11068
<b>Description</b>	
<p>1. Open the attached shapefile in QGIS.</p> <p>2. Zoom to layer.</p> <p>3. Map canvas becomes blank. Current map scale dialog does not get updated. Zoom tools start behaving strange - mouse scroll zooming does not work, click-zoom in/out and box-zoom out either. Only box-zoom in is OK. Once you box-zoom in or zoom to another layer all is fine again.</p> <p>Debug output after zoom to single point layer:</p> <pre>Debug: /home/shoofi/src/straight/qgis09/src/gui/qgsmacanvas.cpp: 452: (setExtent) Setting empty extent! Debug: /home/shoofi/src/straight/qgis09/src/core/qgsmrenderer.cpp: 202: (render) ===== Rendering ===== Debug: empty extent... not rendering [[QgsGrassPlugin]]::postRender()</pre> <p>Might be related to #651 #154 and #80.</p>
