

QGIS Application - Bug report #10109

centroid fill's svg marker are wrongly sized when exporting to image via composer

2014-04-23 08:27 PM - Mathieu Pellerin - nIRV

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Symbology	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18576
<b>Description</b>		
<p>Long story short, it seems centroid fill's svg marker fail to take factor in the DPI value when exported to image via the composer.</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none"><li>1. Load the attached svg_centroid project</li><li>2. Open the "Composer 1" composer</li><li>3. Export the sheet to an image</li><li>4. Open the exported image and notice how the SVG plane was rendered with the wrong size (too small)</li></ol>		

History

#1 - 2014-05-01 12:06 AM - Mathieu Pellerin - nIRV

- Resolution set to duplicate
- Status changed from Open to Closed

This is a sub-issue of a broader regression with SVG markers, see #10132.

Closing this.
