Don't know if it is related but: does not happen on Ubuntu 14.04. On Ubuntu 12.04 (where I see this issue) when opening a project in QGIS master I get the following even if the project does not include spatialite layers

Traceback (most recent call last):

```
File "/home/giovanni/.qgis2/python/plugins/rt_omero/ManagerPlugin.py", line 98, in loadProject
  from ManagerWindow import ManagerWindow
File "/usr/lib/python2.7/dist-packages/qgis/utils.py", line 453, in __import
  mod = _builtin_import(name, globals, locals, fromlist, level)
File "/home/giovanni/.qgis2/python/plugins/rt_omero/ManagerWindow.py", line 32, in
  from ConnectionManager import ConnectionManager
