

QGIS Plugin Site - Bug report #10142

The "repository" tag is not updated from metadata.txt

2014-04-30 05:05 AM - Borys Jurgiel

Status:	Open	
Priority:	Normal	
Assignee:

Description		
<p>Steps to reproduce:</p> <ol style="list-style-type: none">1. Create a plugin with missing the "repository" tag in the metadata.txt and upload it.2. The application complains about the missing tag of course.3. Create a new (higher) version with that tag added to the metadata.txt and upload it.4. The application still says that tag is missing. <p>Please note the "homepage" and "tracker" tags work properly.</p>

Hi Borys, I could not reproduce this.

After the point 2, the plugin won't get uploaded.

After changing the point 3 (whether still using the same version from point 2, or higher version), the plugin will successfully get uploaded without complaining missing repository.

Did I miss something from your description?
