QGIS Application - Feature request #10149
Identify dock panel needs a button for "clear results"

Description

Since the dock is now always shown, it's difficult to clear the results of an identify operation. At the moment you need to right click the identify window and choose "clear results" to remove the highlight around identified features. I think a button should be added to the panel to speed this up.

Associated revisions

Revision 0c520391 - 2014-05-02 02:11 PM - Jürgen Fischer

identify results:

- restore identify dock (implements #10152)
- add clear button (implements #10149)
- automatically set only item current
- move controls to bottom
