

QGIS Application - Bug report #1019

QGIS error when I close a ring

2008-03-29 06:19 PM - Seba -

Status: Closed	
Priority: Low	
Assignee: leolami -	
Category: Vectors	
Affected QGIS version:	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied:	Resolution: worksforme
Crashes QGIS or corrupts data:	Copied to github as #: 11079
Description	
When I close the ring I created a polygon I get the following message and the program closes:	
"Runtime error!	
Program: C:\\Programmi\\QuantumGis\\qgis.exe	
Thi application has request Runtime to terminate it in an unusual way. Please contact the application's support team for more information."

Which qgis build does this apply to and what data source were you using?

#2 - 2008-03-29 07:21 PM - Seba -

Replying to [comment:1 jef]:

*Which qgis build does this apply to and what data source were you using?
to version 0.9.1 and 0.9.2, I have used a shape created by me.*

I curious about the "Microsoft Visual C++ Runtime Library" runtime error. Is this from a MSVC build?

#4 - 2008-03-30 09:35 AM - Seba -

When I have installed qgis has appeared the warning that python and PQ4 was not installed;can this error create that one?

#5 - 2008-07-16 06:40 AM - Maciej Sieczka -

I don't have Windows, but under WINE 1.0.0 on amd64 Debian testing I can't reproduce this error with Shapefile data using Marco's "QGIS 0.11.0 for Windows pre-release testing installer".

#6 - 2008-10-22 10:31 AM - Magnus Homann

- Status changed from Open to Closed

- Resolution set to worksforme

I cannot reproduce this on Win XP with 0.9.2. If submitter feels the problem persists, please re-open this bug.

#7 - 2009-08-22 12:57 AM - Anonymous

Milestone Version 1.0.0 deleted
