| <b>Affected QGIS version:</b> master  | <b>Regression?:</b> No               |
| <b>Operating System:</b>  | <b>Easy fix?:</b> No                 |
| <b>Pull Request or Patch supplied:</b> Yes  | <b>Resolution:</b> fixed/implemented |
| <b>Crashes QGIS or corrupts data:</b> Yes   | <b>Copied to github as #:</b> 18647  |
| <b>Description</b>  |                                      |
| <p>The cache should be updated thanks to QFileSystemWatcher in QgsConfigCache, but processEvents() is never called in the main loop.</p> <p>Once processEvents() is added, there is a crash when updating the project and submitting another wms GetPrint request because QgsMapLayerRegistry is not cleaned up between calls.</p> <p>Adding QgsMapLayerRegistry::instance()-&gt;removeAllMapLayers() in the loop solves that.</p> <p>I'll submit a PR today.</p> |                                      |

### Associated revisions

Revision 06738d49 - 2014-05-07 02:06 PM - Vincent Mora

fix #10198

Revision 436973dc - 2014-05-13 05:20 PM - Marco Hugentobler

Merge pull request #1337 from Oslandia/test\_qgis\_mapserver

fix #10198

### History

#1 - 2014-05-07 05:16 AM - Vincent Mora

- Crashes QGIS or corrupts data changed from No to Yes
- Pull Request or Patch supplied changed from No to Yes
- Resolution set to fixed/implemented

PR is there <https://github.com/qgis/QGIS/pull/1337>

#2 - 2014-05-13 08:20 AM - Marco Hugentobler

- Status changed from Open to Closed

Fixed in changeset commit:"436973dc033b4d2324be2f20310a5b37a96d3c4d".
