

QGIS Application - Bug report #102

Invalid response from WMS server

2006-04-23 12:01 PM - Martin Dobias

Status: Closed	
Priority: Low	
Assignee: Brendan Morley -	
Category: Web Services clients/WMS	
Affected QGIS version:	Regression?: No
Operating System: Gentoo	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 10161

Description

I've tried to add this WMS server:

http://eusoils.jrc.it:80/wmsconnector/com.esri.wms.Esrimap/Eusoils_WMS?

This was response after pressing connect:

Could not understand the response. The wms provider said:

WMS Server responded unexpectedly with HTTP Status Code 404 (Object Not Found)

Tried URL:

http://eusoils.jrc.it:80/wmsconnector/com.esri.wms.Esrimap/Eusoils_WMS?SERVICE=WMS&REQUEST=GetCapabilities

But when tried in browser the same URL returned valid XML document.

History

#1 - 2006-04-23 01:45 PM - Gavin Macaulay -

- Resolution set to duplicate

- Status changed from Open to Closed

This is the same problem as ticket #3929.

I note that the map server in both cases is an ESRI product (from the .../com.esri.wms.Esrimap/... part of the URL).
