

QGIS Application - Bug report #10205

Size of markers in marker line broken in master

2014-05-07 05:54 PM - Nyall Dawson

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category: Symbology	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 18651
Description	
0575c71f2c884a638cd3656a539fc7ce65a26671 has broken marker line support. Steps to reproduce:	
<ol style="list-style-type: none">1. Try and style a layer with a marker line. Initial style preview looks ok2. Apply the style to the layer and close the properties dialog - nothing is rendered for the layer3. Open the layer properties - the size of the markers in the marker line is set to a huge number markers are not rendered

I confirm, it's a serious regression.

#2 - 2014-05-08 05:16 AM - Giovanni Manghi

- Target version set to Version 2.4
- Category set to Symbology

maybe it is just another incarnation of the issue that broke graduated/categorized symbology in qgis master.

- Status changed from Open to Feedback

I cannot confirm with current master on linux. I use single symbol renderer with default marker line symbol and the layer rendering worked as expected. Could you please try again if it is still a problem and possibly provide more detailed steps to reproduce?
