| Easy fix?:  | No              |   |
| Description   |                 |   |
| During data entry from the parent table, the user is allowed to change the FK id. This is handy on the child table form, but in the parent one IMHO is only confusing and source of errors. |                 |   |
