QGIS Application - Feature request #10272 Test value input for expression builder

2014-05-14 09:29 PM - Nathan Woodrow

Status: Open Priority: Normal

Assignee: Nathan Woodrow
Category: Expressions

Pull Request or Patch sumplied: Resolution:

Easy fix?: No Copied to github as #: 18704

Description

It would be nice to be able to provide test field values for the expression builder to test expressions before applying. This should allow an entry box for each field that is defined in the expression area. Sometimes the first feature doesn't expose enough information to test an expression.

Maybe a box as in the query builder would be enough, with the option "Show first 10 results" and "Show all"?
