

## QGIS Application - Bug report #10281

### Database relations: after starting edit mode, selected record in embedded form not editable

2014-05-16 02:58 AM - Andreas Neumann

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>	Matthias Kuhn	
<b>Category:</b>	GUI	
<b>Affected QGIS version:</b>	2.2.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18710
<b>Description</b>		
<p>Situation: database relation defined, form embedded. When starting to edit the embedded form, the selected record is not editable. One has to navigate to a different record and then back to edit the initially selected record. If there is only one record in the relation (embedded form) there is no chance to edit the record in the embedded form at all.</p> <p>See also attached screenshot</p> <p>If you need further information, please let me know.</p>
