Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 18720
Description	
<p>Add a mode in which the interval size would be set manually</p> <p>Use case: You want the interval size to be exactly 10</p> <p>You can try to do it with Pretty Breaks but it is time consuming and it works first looking if it can classify for example by 2000,1000,500,200 etc</p> <p>Maybe Pretty breaks should be replaced by "Defined Interval" as defining the interval would achieve what Pretty Breaks does, but extends it</p> <p>When selecting defined interval Classes should be grayed out and Interval Size shown</p>

- Easy fix? set to No

#2 - 2018-03-19 06:54 PM - Antonio Locandro

Not available in latest version and actually I can't seem to find pretty break anymore
