Description

Hi,

I'm getting this error with some SAGA tools. The first time I try to run the tool, it shows this error, but trying again it opens the dialog box.

An error has occurred while executing Python code:

This is happening to me on windows, with QGIS 2.2 and SAGA 1.0.8.

On Linux, with QGIS 2.2 and SAGA 2.1.1, this does not happen.
