| Easy fix?: No | Copied to github as #: 18730 |
| Description | |
| <p>The Identify Feature result list shows the Click coordinate (as in #810).</p> <p>It would be nice to also show the coordinate of the "identified" feature.</p> <p>If it is a point feature, this should be trivial. With others it would be more complicated (and a list of hundreds of coordinates of a big polygon would be useless), so I guess only showing them for point features should be enough.</p> | |
