Pull Request or Patch supplied:	No		**Resolution:**	fixed/implemented
Easy fix?:	No		**Copied to github as #:**	18730

Description

The Identify Feature result list shows the Click coordinate (as in #810).

It would be nice to also show the coordinate of the "identified" feature.

If it is a point feature, this should be trivial. With others is would be more complicated (and a list of hundreds of coordinates of a big polygon would be useless), so I guess only showing them for point features should be enough.

History

#1 - 2016-02-01 12:58 AM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed
