

QGIS Application - Bug report #10345

New field calculator bar does not refresh values after update

2014-05-25 08:11 AM - Alexandre Neto

Status:	Closed	
Priority:	Normal	
Assignee:	Nathan Woodrow	
Category:	Attribute table	
Affected QGIS version:	master	Regression?: No
Operating System:	Ubuntu 12.10	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18766
Description Using the new field calculator bar, I have noticed that the values are not refreshed unless you scroll the attribute table down. When you press the update button, nothing seems to have happen, making the user press more than once. As soon as you scroll it, the values are updated

Sounds more like an attribute table / layer cache problem than related to the expression bar. This does not need to do anything but updating and if you say that works, the problem is somewhere else.
