

QGIS Application - Bug report #1036
GRASS toolbox windows cannot be resized vertically

2008-04-11 12:16 PM - Micha Silver

Status:	Closed	
Priority:	Low	
Assignee:	nobody -	
Category:	GRASS	
Affected QGIS version:		Regression?: No
Operating System:	All	Easy fix?: No
Pull Request or Patch supplied:		Resolution: fixed
Crashes QGIS or corrupts data:		Copied to github as #: 11096
Description When starting a GRASS module in the toolbox window, the window automatically resizes vertically to allow room for all the controls to fit in. If there are many controls, the "lower" ones disappear off the screen and are not accessible. The window cannot be resized in the vertical direction, and there is no scrollbar, so the "Run" and "Close" buttons cannot be clicked. This issue appears, for example, when using the r.mapcalculator . The module window contains <ul style="list-style-type: none">- 6 controls for entering raster maps- a row for the equation- and a row for the output map. The "Run" button cannot be reached. I've seen this behavior on both Linux and Windows. <i>A work-around:</i> Edit the r.mapcalculator qgm file and remove two of the option rows. <i>The solution:</i> could be to add a scrollbar to the module window.

- Resolution set to fixed
- Status changed from Open to Closed

Fixed in by putting options list in a scroll view.
