

QGIS Application - Bug report #10362

Crash on rollback after addition of a feature

2014-05-26 08:27 AM - Martin Dobias

Status: Closed	
Priority: Severe/Regression	
Assignee: Matthias Kuhn	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution:
Crashes QGIS or corrupts data:	Copied to github as #: 18781
Description	
<p>Something is getting wrong with the vector layer commands.</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none">1. add a vector layer2. start editing3. add a new feature4. stop editing without saving changes (rollback) -> crash <p>In qgsattributeform.cpp, I have tried to move beginEditCommand() on line 177 to the else branch few lines later. That helps, but then there is a new issue that new "add feature" command is immediately undo-ed (i.e. it is still in the undo stack, but not active).</p>
