

QGIS Application - Feature request #10382

show map item outlines in canvas

2014-05-28 05:27 AM - Gavin Fleming

Status:	Open	
Priority:	Normal

Category:	Unknown	
Pull Request or Patch supplied:		Resolution:
Easy fix?:	No	Copied to github as #: 18800
Description		
<p>Just like a spreadsheet shows the borders of the print pages, it would be really useful to be able to toggle the borders of the map items in the composers to be viewed in the canvas. This would help with label and annotation placement and generally give a better sense of what is going to be printed.</p> <p>These could be represented as a group layer containing memory layers, one per map item, with names like &lt;composer1&gt;:&lt;map0&gt;</p>
