QGIS Application - Bug report #1039
PostGIS: unclear error message connecting to a wrong port
2008-04-13 07:49 AM - Maciej Sieczka -

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	Data Provider		
Affected QGIS version:		**Regression?:**	No
Operating System:	All	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	wontfix
Crashes QGIS or corrupts data:		**Copied to github as #:**	11099

Description

When trying to connect to a port Postgres does not work on a cryptic "Extended error information" is given:

Connection failed - Check settings and try again.

Extended error information:
expected authentication request from server, but received S

History

#1 - 2008-04-13 08:22 AM - Jürgen Fischer

- Resolution set to wontfix

- Status changed from Open to Closed

Does the error message get truncated like that? I get

could not connect to server: Connection refused (0x0000274D/10061)
Is the server running on host "192.168.49.12" and accepting
    TCP/IP connections on port 5433?

which seems pretty clear. But I guess in your case there is something listing on the port you try to connect which even supports SSL as I get

received invalid response to SSL negotiation: 2

when connecting a SMTP port w/o SSL.

Anyway, those error messages are returned by the postgres client library and passed on to the user as that is all we known and therefore probably the best we can do.

Replying to [comment:1 jef]:

> *Does the error message get truncated like that?*

Exactly. All I get is:

Connection failed - Check settings and try again.

Extended error information:
expected authentication request from server, but received S

It was SSH port I tried to connect to by mistake.

I checked with [[PgAdmin]]. It displays same cryptic message. Not a QGIS issue it seems. Sorry for the fuss.

BTW - localised messages are garbled when they contain non-ASCII chars. Eg. in PL UTF8 locale I get:

Connection failed - Check settings and try again.

Extended error information:
could not connect to server: Przekroczony czas oczekiwania na poÅ?Ä?czenie
    Is the server running on host "127.0.0.1" and accepting
    TCP/IP connections on port 22?

instead of:

Connection failed - Check settings and try again.

Extended error information:
could not connect to server: Przekroczony czas oczekiwania na połączenie
    Is the server running on host "127.0.0.1" and accepting
    TCP/IP connections on port 22?
