

QGIS Application - Bug report #10408

Labeling don't work

2014-06-01 02:27 AM - Alexander Bruy

Status: Closed	
Priority: Severe/Regression	
Assignee:	
Category:	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied:	Resolution: duplicate
Crashes QGIS or corrupts data:	Copied to github as #: 18824
Description	
<p>Seems labeling is broken now. I can select field or enter expression into label field, but after pressing Apply button this field cleared and no label shown on canvas. It is very easy to reproduce:</p> <ul style="list-style-type: none">- open vector layer- go to layer properties, Labels tab- turn labels on, select field- press Apply button- field will be cleared and there are no labels on canvas after closing dialog. <p>Maybe related to switch to QgsFieldExpressionWidget</p>
