

QGIS Application - Feature request #10438

GetFeatureInfo on aliased fields

2014-06-03 09:45 AM - Giovanni Allegri

Status: Open	
Priority: Normal	
Assignee:	
Category: QGIS Server	
Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 18852
Description	
<p>GetFeatureInfo doesn't work on fields where an alias is set, because subsetstring doesn't work on aliased fields. We should check if the field set in the filter is an alias for an attribute. Exactly the reverse of what is done here to generate the output attributes</p>	

History

#1 - 2014-06-03 09:46 AM - Giovanni Allegri

- Target version set to Future Release - Nice to have
- Category set to QGIS Server

#2 - 2017-05-01 12:47 AM - Giovanni Manghi

- Easy fix? set to No
