Description

I was wondering if it would be difficult to add a Statistics (Vector menu -> Analysis Tools -> Basic Statistics) to the attribute window. For instance I had two features selected and wanted to find the total area. I had to drop back to the Main QGIS Menu to find out this information. Had their been a button there on the table it would have made more sense.

Just wondering. Keep up the good work

- Target version set to Future Release - Nice to have

- Category set to Attribute table

Sure that makes a lot of sense. Might make it work on all the values in the table then it will work with filters as well.
