QGIS Application - Bug report #10475
fTools: "Symmetrical Difference" Tool behaves like "Difference" Tools

2014-06-05 07:20 AM - Harrissou Santanna

Status:	Closed		
Priority:	Severe/Regression		
Assignee:	Martin Dobias		
Category:	Processing/QGIS		
Affected QGIS version:	2.2.0	**Regression?:**	
Operating System:		**Easy fix?:**	
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	18887

Description

All is in the title. Using "Symmetrical Difference" Tool (Vector menu > Geoprocessing Tools) on two overlapping layers, you get the output "Difference" tool gives.
Instead of areas of both input and difference layers that do not intersect, you just have areas of the input layer not intersecting the clip layer.

Worked on QGIS 1.8 but not since 2.0
