I have started including the Server manual in the Developer Guide I have been working on [0,1,2] (currently in writing hiatus until after 2.4 release). I have not converted the Server wiki page over to rST, but am planning on it.

I think it is more appropriate in a Dev Guide, since it is more about server configuration, which IMO is a bit more than most users are prepared to do. I am looking to add configurations for other lightweight server setups as well. For example, lighttpd/spawn-fcgi is already used for the labeling unit tests, and I have used nginx/uwsgi in the past; both with mapproxy as well.

- Status changed from Open to Feedback

As I can see, documentation already updated. Can we close this?

#3 - 2016-01-18 06:27 AM - Paolo Cavallini

If this is the case, please remove the duplicated wiki page.

Thanks for looking into this.

Thanks for looking into this.

you should have the proper rights to modify/delete wiki pages in the hub.

Better if someone familiar with the documentation process will help, or do it directly.

- *Description updated*

Closing. I think there's currently enough and up to date information about QGIS Server in the user and training manuals

Thanks a lot. Could you please check that the old info is actually deleted, to avoid leaving obsolete info around?

#14 - 2017-08-21 04:27 PM - Harrissou Santanna

Paolo, it shouldn't be available anyway given that it was on the removed (hidden?) wiki

Hopefully ;)

Merci.
