

QGIS Application - Bug report #10514

"Digitizing" the cursor icon always have a pink cross below even with no snapping options ON

2014-06-09 10:13 AM - Alexandre Neto

Status:	Closed	
Priority:	Severe/Regression	
Assignee:	Martin Dobias	
Category:	Digitising	
Affected QGIS version:	2.2.0	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 18924
Description		
<p>While digitizing, the cursor Icon has always the snapping pink cross, even when there are no features around or the snapping is turned OFF.</p> <p>To reproduce the error, just open a layer, start editing and start draw some polygon or line.</p> <p>This is does not happen in the stable version, therefore I will mark it as a regression.</p> <p>Have a look at the image. (the pink cross was below the digitizing icon, but windows screenshots does not keep the cursor)</p>
