QGIS Application - Bug report #1052
Uninitialized field variables in QgsPostgresProvider in trunk r8383

2008-04-29 12:12 AM - shader -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Data Provider			
Affected QGIS version:			**Regression?:**	No
Operating System:	All		**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed
Crashes QGIS or corrupts data:			**Copied to github as #:**	11112

Description

[[QgsPostgresProvider]] has bug in uninitilized variables like useWkbHex and others that must be initialized in [[QgsPostgresProvider]]::postgisVersion. But if we have 2 and more layers from same [[PostgreSQL]] database then 1st layer has properly initialized, but 2nd and others hasn't. Function postgisVersion not executed for that layers. It may be fixed by simple patch (attached)
