

## QGIS Application - Bug report #10538

### Build Overviews for a Raster

2014-06-10 11:48 AM - Randal Hale

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	GDAL Tools	
<b>Affected QGIS version:</b>	master	<b>Regression?:</b> No
<b>Operating System:</b>	Trusty Tahr	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18946
<b>Description</b>  I have an image - I went to delete the existing pyramid (using clean) and received an error "Too many commands". The command line that is generated is: gdaladdo -r AVERAGE -ro -clean /media/projects/training/qgis/Production_data_QGIS1/ACC_Data/ACC2013Aerial.tif "[select levels]"  I manually ran the gdaladdo command: gdaladdo -r AVERAGE -ro -clean /media/projects/training/qgis/Production_data_QGIS1/ACC_Data/ACC2013Aerial.tif and everything worked.

looks like you didn't select the levels you want, is that the case? [select levels] should not appear if you select the levels you want.

How did you install qgis, using the qgis debiand repos?
