

QGIS Application - Bug report #10558

Unexpected interactions between labelling and diagrams

2014-06-12 12:50 AM - Tim Sutton

<b>Status:</b>	Closed	
<b>Priority:</b>	High	
<b>Assignee:</b>	Larry Shaffer	
<b>Category:</b>	Labelling	
<b>Affected QGIS version:</b>	2.2.0	<b>Regression?:</b> No
<b>Operating System:</b>	Linux	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 18965
<b>Description</b>		
<p>I get some strange interactions between labels and diagrams. In particular:</p> <ul style="list-style-type: none"><li>- Adding pi diagrams to my layer works, but for one area, no pie is rendered...</li><li>- ...until I go and enable labelling in which case no labels render, but the missing pie chart shows ...</li><li>- ...until I disable labelling in which case all pies are hidden...</li></ul> <p>I made a small screencast which illustrates this - I will add the link after submitting this ticket.</p> <p>The sample dataset used in the screencasts is attached to this issue.</p> <p>I am giving this issue `high` priority since currently pie and labels cannot be used together in the same layer.</p>		

History

#1 - 2014-06-12 12:57 AM - Tim Sutton

Here is the screencast I made demonstrating some of the rendering issues.

#2 - 2014-06-28 07:45 AM - Jürgen Fischer

- Target version changed from Version 2.4 to Future Release - High Priority

#3 - 2015-04-13 06:25 AM - Nyal Dawson

- Status changed from Open to Feedback

Can you test again with current master version? A lot of diagram related fixes have landed which should have solved this.

#4 - 2015-05-22 04:44 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed

seems fixed in the latest master, reopen if necessary.
