

QGIS Application - Feature request #10579

Allow for automatic and/or manual SVG cache invalidation for user SVG markers

2014-06-13 05:39 PM - Mikhail Titov

Status:	Closed	
Priority:	Low	
Assignee:		
Category:	Symbology	
Pull Request or Patch supplied:		Resolution: duplicate
Easy fix?:	No	Copied to github as #: 18986
Description		
<p>While trying to sketch a couple of markers in Inkscape, I realized I had to quite QGIS every time I made a change (Main reason was text to curves conversion as text was misplaced). This seems like an overkill. It would be nice if there was either just a button "Refresh/Reload" for user SVGs, or use some notification of file system modification to trigger it. Since it is not needed often, perhaps, a button would suffice.</p>
