<b>Description</b>	
<p>Please add labels to the dialog box in download data for OpenStreetMap, accessed from the Vector menu in QGIS 2.2.0</p> <p>As a new user to QGIS, and working through the introduction QGIS Training Manual, I can see that some co-ordinates are required to be input. But which coordinate system is being used? There are so many to choose from, and the training manual does not provide any explanation.</p>
