### Description

Preferences Menu > Options > Renderer tab
On Mac OSX, all the options in "Renderer behavior" group are greyed. That includes options like "By default new layers added to the map should be displayed", "Enable back buffer"  and "Use render caching where possible to speed up redraws".
That doesn't help to better speed-up the rendering of the layers.

I don't have master installed but this happens at least on 2.2 and 2.0.

### History

**#1 - 2014-06-17 03:10 AM - Martin Dobias**

*- Resolution set to invalid*

*- Status changed from Open to Closed*

Options > Rendering tab has changed in 2.4 and no options are disabled on Mac OS X anymore
