Pull Request or Patch Applied:	Resolution:
Easy fix?: No	Copied to github as #: 19016
Description	
<p>hello,</p> <p>it would be useful, if qgis could show the user defined error messages (from the mssql server backend) in the qgis messagebar details. now are this errors/messages not visible in the messagebar while editing for instance...</p> <p>MSSQL example for user defined error:</p> <pre>RAISERROR (N'This is my errorstring.', -- Message text. 18, -- Severity, 1 -- State);</pre> <p>under the postgres dataprovider it works with this defined error/exception, qgis show the 'This is my errorstring.' in the messagebar details.</p> <pre>RAISE EXCEPTION 'This is my errorstring.'</pre> <p>thanks jan</p>	

History

#1 - 2014-06-17 09:39 AM - Jürgen Fischer

- Assignee deleted (*Jürgen Fischer*)
- Category changed from *Data Provider* to *Data Provider/MSSQL*

#2 - 2014-06-28 07:45 AM - Jürgen Fischer
