

QGIS Application - Feature request #1063

SVG Symbols repository

2008-05-06 04:18 AM - pls -

Status: Closed	
Priority: Low	
Assignee:	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 11123
Description	
Why not set-up an SVG symbols repository to share symbols between users? :) It could be structured as a plugin, such as the new "Plugin Installer" one, or made directly accessible from the QGIS website :)

Nice idea - perhaps something to propose to the developer list for one of the pythonistas to build?

More generally the repo should keep also styles. The necessary steps IMHO are:

- a repo page (presumably an extension of the existing plugins.qgis.org webapp)
- a method to upload (registered) user defined styles, with mandatory tags (username, copyright, etc.)
- a method to download
- a web page with the list of available styles and symbols, with automatic preview.
