Fix #10655 (race condition in QgsCredentials)

Example of race condition during rendering:

Threads 1 and 2 call get(), it checks that there are cached credentials.

Thread 1 takes the cached credentials, thread 2 will get no data -> will request credentials in dialog

Revision f71fad37 - 2014-06-21 05:37 AM - Nyal Dawson

[composer] Always default attribute tables to show all visible features (fix #10655)
