

QGIS Application - Feature request #1067

Outline style composer

2008-05-06 04:56 AM - pls -

Status: Closed	
Priority: Low	
Assignee: Tim Sutton	
Category: Symbology	
Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 11127
Description	
Actually only 6 type of outline styles are available; a style composer should be suitable in order to generate custom line styles, according to their professional use. Example: <u>+-..+-..++..</u>

Sorry, my bad! :)

#2 - 2008-07-09 07:45 AM - Tim Sutton

Outline symbolisation (and line symbolisation) is currently limited to the simple styles provided by Qt (and the option to make other dash based styles). It is my plan to come up with some way to use more sophisticated styles e.g. for symbolizing but this will probably only happen post 1.0. I will put it to the 1.0 milestone for now.

Ok, nice to hear that's some interest in this direction! :)

#4 - 2010-06-11 09:59 PM - Paolo Cavallini

- Resolution set to fixed

- Status changed from Open to Closed

New symbology should have solved this. Please reopen if unsatisfied with current solution
