**Description**

Using Spanish translation [es] the merge row of the form appears blank, and the result is a null.

The problem only happens when attributes are selected from a feature, for concatenation, sum, max and other options work.

Using [fr] or [en_US] translations it works!

Is a old bug, so this bug exists in version 2.2.0 and version 2.3.0-25 d62a498 23-Jun-2014
