<b>Category:</b> Processing/QGIS	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 19088
<b>Description</b>	
It would be very usefull to have the possibility to add a field with shapefile filename in the "merge shapefile" vector tool. Thanks

#### History

##### #1 - 2014-06-24 03:49 AM - Giovanni Manghi

- Status changed from Open to Feedback
- OS version deleted (2.2)

what tool do you refer? the one in the vector menu or in the advanced digitizing toolbar?

what is the use case for such request?

##### #2 - 2014-06-24 04:10 AM - A mulazzani

Yes that one. Basically it would be usefull to give this options to incorporate the plugin "Merge shapes" function (see below), which doesn't work very well (#8549).

Merge shapes<sup>°</sup>

Merge multiple shapes to one

- Target version set to Future Release - Nice to have
- Category set to 44

- Subject changed from *shapefile merge* to *"Merge shapefiles to one"*: add the options available in the *"merge shapes"* plugin

**#4 - 2017-01-02 05:50 AM - Giovanni Manghi**

- Category changed from 44 to *Processing/QGIS*

**#5 - 2017-05-01 12:47 AM - Giovanni Manghi**

- *Easy fix?* set to *No*

**#6 - 2017-06-29 09:23 AM - Nyall Dawson**

- Status changed from *Feedback* to *Closed*

- Resolution set to *fixed/implemented*

Implemented in master - now both the original layer source and layer name are added as new fields to the merged layer.

**#7 - 2017-06-29 12:00 PM - Giovanni Manghi**

Hi Nyall,

has the performance of this new implementation be compared with #7208?

the code available in that ticket was/is **way** faster than the tool we had in QGIS but never considered to replace the QGIS code.
