QGIS Application - Bug report #107
faulty file selector in Grass tools

2006-05-04 01:41 PM - werchowyna-epf-pl -

Status:	Closed		
Priority:	Low		
Assignee:	Redmine Admin		
Category:	GRASS		
Affected QGIS version:		**Regression?:**	No
Operating System:	Debian	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	10166

Description

1. grass tools

2. "Interpolate... (IDW)"

3. error (1.png) pops up followed by a mutant file-selector (2.png, red circle indicates the drop-down arrow, in case it is unclear - yes, Qgis looks bad in Gnome/Ubuntu)

Are you by any chance running QGIS on a remote box using VNC or NX?

#2 - 2006-07-19 11:23 AM - Redmine Admin

No. That was on regular Ubuntu Breezy.

On Dapper today, using qgis 0.8 SVN 2006-07-13 the bug is still present.

Maciek

P.S.

Is it OK to reply by email to the message you send from trac? When I did so I can't see my message here (so I replied via your trac online).

#3 - 2006-08-10 04:17 AM - anonymous -

- Resolution set to fixed

- Status changed from Open to Closed

Unfortunately v.surf.idw parameter in GRASS was changed from col to column.

This has broken QGIS. I have changed the v.surf.idw.qgm in revision 5682

also to column but it won't work with GRASS 6.0.0 only with >= 6.1.

We must hope that GRASS 6.2 will be released soon and people will use

QGIS 0.8 whith GRASS >= 6.1.
