| Operating System: | Windows | Easy fix?: No |
| Pull Request or Patch supplied: | No | Resolution: |
| Crashes QGIS or corrupts data: | No | Copied to github as #: 19115 |
| Description | | |
| <p>Hi. I was having trouble using the R scripts after I had enabled the R script and set the path to R (version 3.1, 64 bit).</p> <p>I was trying to run e.g. Home Range Analysis -> Characteristic hull method. It failed with the feedback that R was installed an configured correctly but that adehabitathr and deldir was not loaded. Both packages has been installed and are know to work.</p> <p>In the log window in the background i noticed that there was a writing permission denied message and after fixing the writing permissions in windows the scripvt started working.</p> <p>Maybe that workaround should be included in the manual?</p> <p>Best regards,</p> <p>Nicolai Jorgensen</p> | | |

- #1 - 2014-06-28 07:36 AM - Jürgen Fischer
- Target version changed from Version 2.2 to Future Release - Lower Priority
- #2 - 2014-10-09 07:40 AM - Alexander Bruy
- Category changed from 94 to 124
- #3 - 2015-05-01 02:26 PM - Stefan Blumentrath
- Status changed from Open to Closed
- Duplicate to: #11603
- #4 - 2017-05-01 10:58 AM - Giovanni Manghi
- Regression? set to No
- #5 - 2017-05-01 11:01 AM - Giovanni Manghi
- Easy fix? set to No
- #6 - 2017-05-01 11:04 AM - Giovanni Manghi

Some providers are being removed from QGIS/Processing (will be available as plugin) and so are their categories in the bug tracker. To not leave them orphaned of a category they are being reassigned to processing/core.
