QGIS Application - Bug report #10734
Random selection should select only inside defined subsets

2014-06-26 07:07 AM - Markus Straub

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Processing/QGIS		
Affected QGIS version:	master	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	worksforme
Crashes QGIS or corrupts data:		**Copied to github as #:**	19119

Description

Expected behaviour when trying to randomly select points from a point layer which feature subsets enabled (filtering some of the points)

-> only non-filtered points are used for the random selection

Actual behaviour:

-> the status bar tells me my desired nr of points are selected, but actually only a smaller number of the non-filtered points is selected
