

QGIS Application - Feature request #10737

Easier loading of qlr files

2014-06-26 09:26 AM - Paolo Cavallini

Status: Closed	
Priority: Normal	
Assignee: Nathan Woodrow	
Category: Browser	
Pull Request or Patch Supplied:	Resolution:
Easy fix?: No	Copied to github as #: 19121
Description	
qlr files are filtered out from the browser, so I do not see an easy way of adding them

The new layer definition files added recently ist's really great.

But it's only possible to add .qlr file to a QGIS project through the menu Layer, option add from layer definition file... or by drag and drop the .qlr directly into the GUI, like it is currently possible to do with supported data files.

It would be nice an easy way like a button similar to the Add Vector Layer.

Another thing that could be equal to the Add Vector layer is the possibility to add more than one file at once.

- Tracker changed from Bug report to Feature request

#4 - 2017-01-13 02:27 AM - Sylvain M.

I confirm the interest of having a button to add QLR directly into QGIS.

I add a problem that I encounter every time I open QLR layers : unlike all the other buttons and menus for adding layers, QGIS does not remember the last folder used and points to C:\\Users\\myusername.

This forces us to re-examine the entire tree to access each data.

#5 - 2017-01-16 03:06 AM - Mats Elfstrom

I second this motion strongly. In the process of setting up a shared QGIS environment, I planned to use *.qlr files to distribute predefined layers for users. It was a surprise that they are missing from the Browser.

Adding the file type there, and making it possible to drag or doubleclick them to add them to the canvas does not seem like a difficult task. Will this be fixed in 3.0?

#6 - 2017-05-01 12:47 AM - Giovanni Manghi

- *Easy fix? set to No*

#7 - 2017-08-31 07:14 PM - olivier olivier

Hi,

In 2.18 it's possible to drag/drop qlr files to canvas.

Olivier

#8 - 2017-09-01 12:26 AM - Nyal Dawson

- *Status changed from Open to Feedback*

So this can be closed?

#9 - 2017-09-01 07:58 AM - Dominique Lyszczarz

Qlr files are still missing from the browser, this is an annoying issue for those who mainly use it for loading data. Hope to see this fixed in 3.0

#10 - 2017-09-01 04:51 PM - Giovanni Manghi

- *Status changed from Feedback to Open*

#11 - 2017-09-20 09:19 PM - Nyal Dawson

- *Status changed from Open to Closed*

- *% Done changed from 0 to 100*

Applied in changeset commit:qgis|fcf2fcae5abfb909288a65f2872746495b3a3fce.

This forces us to re-examine the entire tree to access each data.

Actually QGIS still does not remember the last folder used in this tool and points to C:\\Users\\myusername
