

QGIS Application - Bug report #10757
PostGIS table view loads but won't display

2014-06-30 07:01 AM - Mattia De Agostino

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider/PostGIS	
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: end of life
Crashes QGIS or corrupts data:	No	Copied to github as #: 19140
Description PostGIS (v. 2.0.4 on Windows, under PostgreSQL v. 9.2.8-4) table Views with 4d geometry are loaded in QGIS 2.4 but are not displayed. The attribute table is visible and it is possible to query against it. The layers display with no issues in QGIS 2.0, while the same problem was tracked in QGIS 2.2 (both for Tables and Views - Bug report #9748 - Closed). In QGIS 2.4, 4d geometry tables are correctly drawn. Also, converting the geometry to 2d (using ST_Force2d) Table View results being visible in QGIS 2.4.
