### Graphical Modeler: does not save parameter value when editing a model

<b>Affected QGIS version:</b> 2.4.0	<b>Regression?:</b> No

<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 19156
<b>Description</b>	
<p>I have a model which uses the Fixed Distance Buffer, I have tried to edit the value to another one after saved and it keeps resetting to 10.0 not even the last used value, this happens randomly I edit 20 times and 19 gives me 10.0 while 1 gets me the value I want.</p> <p>I can suspect this behaviour may be present in other algorithms while using them in graphical modeler, seems like if processing is overriding with defaults the values but I can't say for sure.</p>	

#### History

##### #1 - 2014-07-02 01:59 AM - Giovanni Manghi

- Project changed from 78 to QGIS Application
- Affected QGIS version set to 2.4.0
- Crashes QGIS or corrupts data set to No

##### #2 - 2014-07-02 01:59 AM - Giovanni Manghi

- Category set to 94

##### #3 - 2014-07-02 02:02 AM - Giovanni Manghi

- Subject changed from Graphical Modeler to Graphical Modeler: does not save parameter value when editing a model
- Status changed from Open to Feedback

The modeller have been already overhauled in qgis master (after 2.4 was released), it may be worth to re-test there before further investigating. One drawback: the models made in qgis up to 2.4 will not be compatible with the new overhauled modeller that will ship in 2.6

PS

please use more meaningful subjects

I will try it, the model I have is small so it should be easy to remake.

PS, I will try on the subjects but it gets difficult to try to condense it
