

QGIS Application - Bug report #10775

Empty attribute dialog shown for memory layers

2014-07-01 11:25 PM - Simon Kokkendorff

Status:	Closed	
Priority:	Low	
Assignee:		
Category:		
Affected QGIS version:	2.4.0	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: wontfix
Crashes QGIS or corrupts data:	No	Copied to github as #: 19157
Description		
<p>In the new QGIS 2.4 an empty attribute dialog is shown when adding a feature to a memory layer, which does not contain any fields. So you have to click OK in this empty dialog to proceed, which was not the case in QGIS 2.2.</p> <p>Not sure if its a bug or a feature though :-)</p>		

Associated revisions

Revision ee68332e - 2015-02-25 11:56 AM - Nyall Dawson

Suppress attribute form popup if layer has no fields

Prevents empty form popup for layers with no fields (eg memory layers).

If desired, this behaviour can be overridden by the layer's feature form suppress option, eg if form has python logic which makes it useful even with no fields.

(fix #10775)

- Status changed from Open to Closed

You can use the option "suppress attribute form..." option in layer properties/fields to get the same behavior.

We didn't want to forbid to show an empty dialog because there might be python logic in there (e.g. you could show coordinates on a r/o label).

- *Resolution set to wontfix*

#3 - 2015-02-24 10:42 PM - Paolo Cavallini
- *Status changed from Closed to Reopened*

Better disable it by deafult, and let the user reenable it if add the Python logic.
